

OF ALL THE

SCARY THINGS

THAT CAN

SABOTAGE

a NETWORK,

THIS ONE IS BY FAR THE DEADLIEST.

### Human Error Is The Single Biggest Cause Of Information Security Breaches.

Statistics show that up to 80% of security problems are caused by people. So instead of focusing on securing hardware and software, it's crucial to consider another kind of security: education. (ISC)<sup>2</sup> is the non-profit global leader in educating and certifying information security professionals. Our members have benchmark credentials which allow them to anticipate and fend off attacks. So look into (ISC)<sup>2</sup>. Because you never know. You could be the target of some creepy cybercrime as you read this.
