

NICE

NATIONAL INITIATIVE FOR **CYBERSECURITY** EDUCATION

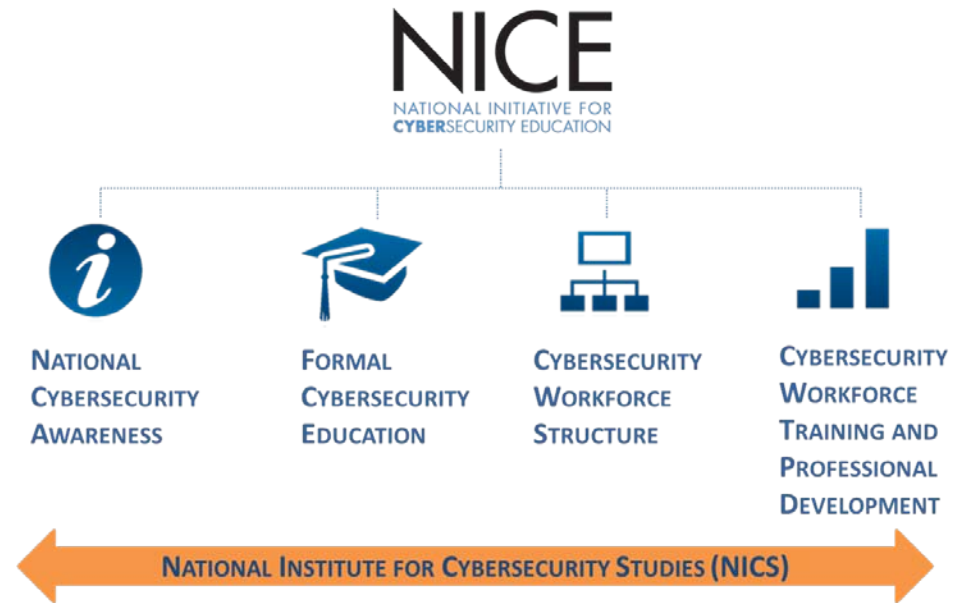

What the National Initiative for Cybersecurity Education (NICE) is doing for you!

Margaret “Peggy” Maxson
Director, National Cybersecurity Education
Strategy, DHS

A National Problem

- The Nation needs greater cybersecurity awareness and more cybersecurity experts.
- There is a lack of communication among government, private industry, and academia.
- Many cybersecurity training programs exist but there is little consistency among programs, and potential employees lack information about the skills needed for jobs.
- Cybersecurity career development and scholarships are available but uncoordinated, and the resources that do exist are difficult to find.

The National Initiative for Cybersecurity Education (NICE) is a nationally coordinated effort created following the recognition in two Presidential directives of the need for a robust, competent cybersecurity workforce.

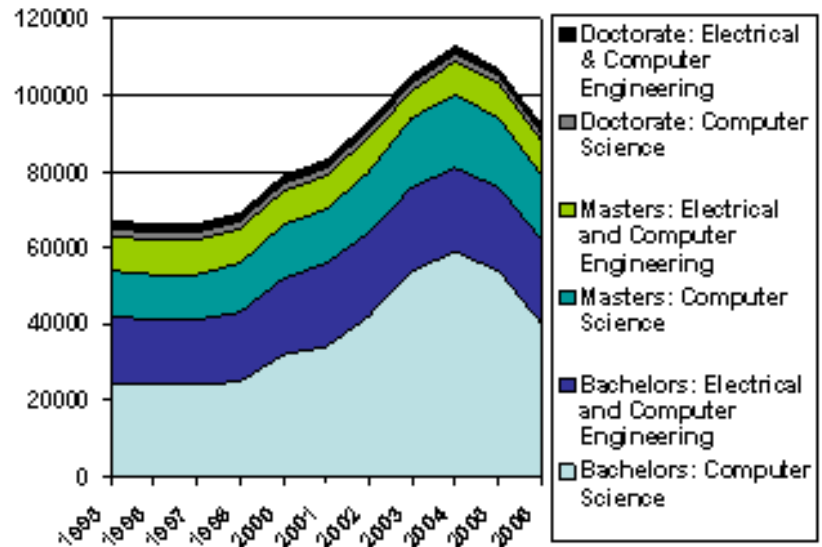

For more information on NICE, visit www.nist.gov/nice.

The Challenge

TIMSS Mathematics Test Score Comparison (2007):
 Avg. = 500 Source: TIMSS (2007)

Grade	Four		Grade	Eight
Country	Score		Country	Score
Hong Kong	607		Chinese Taipei	598
Singapore	599		Rep. of Korea	597
Chinese Taipei	576		Singapore	593
Japan	568		Hong Kong	572
Kazakhstan	549		Japan	570
Russian Federat.	544		Hungary	517
England	541		England	513
Latvia	537		Russian Federat.	512
Netherlands	535		United States	508
Lithuania	530		Lithuania	506
United States	529		Czech Republic	504

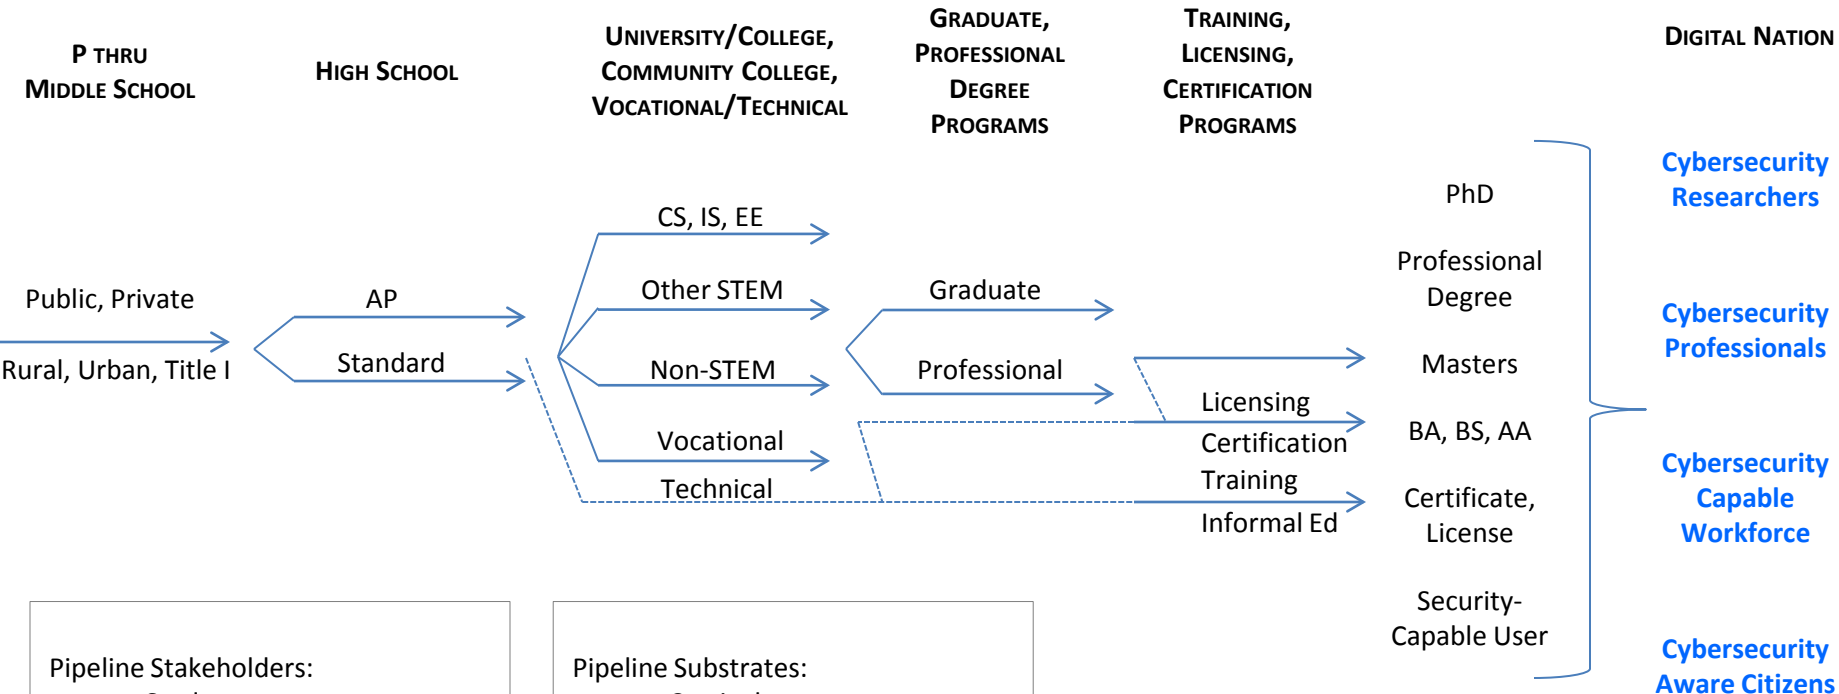

Supply of Traditional NIT Graduates (1995-2000) (NCES)

Computing and Information Sciences as Intended Major on SAT

The Pipeline

- Pipeline Stakeholders:**
- Students
 - Parents
 - Teachers
 - Educational Institutions
 - State, Local Government
 - Federal Government
 - Professional Organizations
 - Commercial Sector

- Pipeline Substrates:**
- Curriculum
 - Ontologies, Taxonomies
 - Standards
 - Teacher Preparation
 - Public Awareness
 - Education Technologies
 - Science and Practice of Learning

National Cybersecurity Workforce Framework

The Framework, version 1.0 published 22 August 2012, outlines 31 functional work specialties within the cybersecurity field and is the foundation of the effort.

Framework Use: Numerous efforts are underway to incorporate the Framework in education related activities nation-wide:

- K-12 and beyond cyber competitions are mapping their objectives to the KSA's in the Framework.
- K-12 cyber camps are focusing their activities on the KSA's.
- Higher learning institutions are mapping their curriculum to the framework.
- Find the framework @ <http://www.nist.gov/nice/framework/>

STOP | THINK | CONNECT

Cybersecurity is a shared responsibility. For additional tips and resources for all age groups, visit the Department of Homeland Security's Stop Think Connect™ Campaign.

STAY SAFE

Cybersecurity is for everyone. Awareness is the first step, explore tips & strategies to keep yourself and your family safe.

EXPLORE CAREERS

Explore the 31 Cybersecurity Specialty Areas defined within the National Cybersecurity Workforce Framework

FIND TRAINING

Our automated tool can match you with the professional training you need to keep up with changing threats.

WORKFORCE DEVELOPMENT

Learn about skills gap analysis, training strategies, and other activities to keep your Cyber workforce on top.

DISCOVER EDUCATIONAL OPPORTUNITIES

A Cybersecurity career can begin at different stages. From grade school to graduate school, explore educational opportunities on the CYBER HIGHWAY.

UPCOMING EVENTS

JUN 11 CISSE
June 11 - 13
Lake Buena Vista, FL

JUN 18 Cyber Discovery Camp 1.0
Jun 18 - 23
Baltimore, MD

JUL 9 Cyber Discovery Camp 2.0
Jul 9 - 14
Ruston, LA

AUG 19 GFIRST
Aug 19-24
Atlanta, GA

AUG 28 Information Assurance
Exposition
August 28-30
Nashville, TN

SEP 10 ISC2 Security Congress
Sept 10 - 13
Philadelphia, PA

OCT 1 National Cyber Security
Awareness Month
Oct 1 - Oct 30

OCT 30 NICE Workshop
Oct 30 - Nov 1
Gaithersburg, MD

NOV 11 CAE Principles Meeting
Nov 11 - 13
Atlanta, GA

CELEBRATE AWARENESS

October is National Cyber Security Awareness Month, see what's going on.

AWARENESS TIPS

Provided by US-CERT

ST000001: Holiday Traveling with Personal Items - Enabled Devices

Tuesday, March 20, 2012, 10:16:20 AM
The interval is all our laptops with the mobile phone and other enabled devices, such as smart phones, and tablets. When traveling and leaving a system, and especially during the holidays, consider the wireless network you are using when you complete the address on your device.

ST000001: Understanding Modern Threats - Rootkits and Botnets

Tuesday, March 20, 2012, 10:16:20 AM
Attackers are continually finding new ways to access computer systems. The use of hidden malware such as rootkits and botnets has increased, and you may be a victim without even realizing it.

ST000004: Understanding OSPs

Tuesday, March 20, 2012, 10:16:20 AM
OSPs offer privacy, the email and internet access. In addition to availability, you may want to consider other factors so that you find an ISP that supports all of your needs.

ST000008: Dealing with Cyberstalking

Tuesday, March 20, 2012, 10:16:20 AM
Bullies are taking advantage of technology to intimidate and harass their victims. Dealing with cyberstalking can be difficult, but there are steps you can take.

ST000002: Helping Children Stay Online

Tuesday, March 20, 2012, 10:16:20 AM
Children spend unique periods of time when they use a computer—not only do you have to keep them safe, you have to protect the data on your computer. By taking some simple steps, you can dramatically reduce the threat.

ST000001: Using Caution with USB Drives

Tuesday, March 20, 2012, 10:16:20 AM
USB drives are popular for storing and transporting data, but some of the malware that can infect them come with a USB drive in their code.

NOTE:

Why Cybersecurity Awareness?

More than ever, people rely on the Internet for everything from basic communications, to making transportation reservations, to entertainment. With each click of the mouse, citizens risk their online security if they have not taken the proper precautions to protect themselves and their Personally Identifiable Information (PII). Cybersecurity involves protecting that information by preventing, detecting, and responding to attacks.

Cybersecurity is a growing issue. Our vulnerabilities threaten the safety and livelihood of our citizens' online safety and as such, it is paramount that the government work to increase the public's awareness of cybersecurity and make them active and involved cybercitizens. [Learn about company initiatives](#) to promote Awareness for all Americans.

What Can I do to Protect Myself?

While there are no sure ways to protect yourself from a cyber attack, there are some simple steps you can take to help keep your PII private.

- Set secure passwords and don't share them with anyone. Avoid using common words, phrases, or personal information and update regularly.
- Keep your operating system, browser, anti-virus and other critical software up to date. Security updates and patches are available for free from major companies.
- Verify the authenticity of requests from companies or individuals by contacting them directly. If you are being asked to provide personal information via email, you can independently contact the company directly to verify the request.
- Pay close attention to website URLs. Pay attention to the URLs of websites you visit. Malicious websites sometimes use a variation in common spelling or a different domain (for example, .com instead of .net) to deceive unsuspecting computer users.
- For additional tips visit [STOP|THINK|CONNECT](#) and view our [HOW-TO GUIDE](#).

The government has a number of resources available to the public to learn more about protecting yourself. Get more cybersecurity tips from DHS specific to email, phone, and social media among others, at <http://www.dhs.gov/interagency/cybersecuritytips.stm>. Get additional tips through US-CERT at <http://www.us-cert.gov/ocs/rapid>.

TEACHING

Get new ideas for bringing technology into the classroom, find curriculum resources and strategies for making STEM accessible.

HANDS ON EXPERIENCES

Find camps, competitions and other after-school activities that extend learning beyond the classroom.

DRIVING INNOVATION

Learn about NICE initiatives and programs underway to connect Educators, Students and Technology.

Why promote Cybersecurity & STEM Education?

Personal digital security is critical to the Nation's economy and the security of our critical infrastructure. Improving the cybersecurity posture of the nation requires change and education at the individual level, from grade school to graduate school and beyond. We must build a digitally literate workforce that uses technology in a secure manner. To do so, we must teach science, technology, engineering and math (STEM) and other critical subjects to all students, and educate all students on the secure use of today's evolving technologies.

It is important to have the educational resources in place to make digital literacy and personal security reality. The Department of Education and the National Science Foundation (NSF) lead the [Federal Cybersecurity Education efforts](#) for NICE. Their mission is to bolster formal cybersecurity education programs encompassing kindergarten through 12th grade, higher education and vocational programs, with a focus on the STEM disciplines to provide a pipeline of skilled workers for the private sector and government.
