Josh Case Study Directions

From your readings and utilizing the SETT framework (in your reading) you will be addressing the following 4 Questions (each will be a separate discussion thread--4.1---4.2--4.3--4.4). **Please post your original thread** and **then reply to others (reply to at minimum one other person**) suggestions and comments so that by Nov 2 we can compile and complete a "detailed" SETT framework (i.e., as a group you are dialoguing about this student so that a completed SETT framework/matrix can be completed).

1. What do you know **about Joshu**a? What do you still need to know? How will you find out?
2. What do you know about the **environment**? What do you still need to know? How will you find out?
3. What do you know about his **task**s? What do you still need to know? How will you find out?
4. What might be included in Joshua's system of **tools**?

For this thread answer the first set of questions: What do you know about Joshua? What do you still need to know? How will you find out?
