June, 2010

*We'd like to thank all the people all over the globe and all over the alphabet who helped us build the Logo Tree:*

**A** .....Daniel Ajoy, Eduardo de Antueno, Hal Abelson  
**B** .....Andrew Begel, Carl Bogardus, Dominique Bille, George Birbilis, Ian Bicking, Imre Bornemisza,  
Joshua Bell, Vladimir Batagelj, Wayne Burnett  
**C** .....Charlie, David Costanzo, John St. Clair, Loïc Le Coq, Oliver Schmidt-Chevalier, Paul Cockshott  
**D** .....Andy Dent, Kent Paul Dolan, Marcelo Duschkin, Mike Doyle  
**E**.....G. A. Edgar, Mustafa Elsheikh, Randall Embry  
**F**.....Damien Ferey,  
**G**.....Bill Glass, Jim Goebel,  
**H**.....Brian Harvey, Jamie Hunter, Jim Howe, Markus Hunke, Rachel Hestilow  
**I**.....  
**J**.....Ken Johnson  
**K**.....Eric Klopfer, Leigh Klotz, Susumu Kanemune  
**L**.....Janny Looyenga, Jean-François Lucas, Lionel Laské, Timothy Lipetz  
**M**.....Andreas Micheler, Bakhtiar Mikhak, George Mills, Greg Michaelson, Lorenzo Masetti, Michael Malien,  
Sébastien Magdelyns, Silvano Malfatti  
**N**.....Chaker Nakhli ,Dani Novak, Takeshi Nishiki  
**O**.....  
**P**.....U. B. Pavanaja, Wendy Petti  
**Q**.....  
**R**.....Clem Rutter, Emmanuel Roche  
**S**.....Bojidar Sendov, Brian Silverman, Cynthia Solomon, Daniel Sanderson, Gene Sullivan,  
**T**.....Austin Tate, Gary Teachout, Graham Toal, Marcin Truszel, Peter Tomcsanyi, Seth Tissue,  
**U**.....Peter Ulrich  
**V**.....Carlo Maria Vireca  
**W**.....Arnie Widdowson, Uri Wilensky  
**X**.....  
**Y**.....Andy Yeh, Ben Yates  
**Z**.....

## Introduction

The main goal of the Logo Tree project is to build a genealogical tree of new and old Logo implementations. This tree is expected to clearly demonstrate the evolution, the diversity and the vitality of Logo as a programming language.

The Project will go through three phases. The first phase is called **Data Collection**. It started September 2002 and is still active. This phase is about collecting the names of known Logos and some basic data about each implementation. The second phase, **Data Analysis**, is about the analysis for internal relationships among Logo implementations. This phase will start when the records of the Logo Tree are complete enough. The result of this phase will be having determined clusters of historically and evolutionary related Logos. The last phase is the **Data Visualization**. In it the focus will be on the design and the implementation of an interactive visual representation of the Logo Tree.

### WE DO NEED YOUR HELP!

The information needed for building the Logo Tree is hard to locate. The only way to collect this information is to ask you, Logo users and developers, to help us. If you know something about any Logo implementation that is not already included in the records, do not hesitate to contact the author.

For each Logo we collect these data:

- **Name** - the name of the Logo implementation. Versions that come under the same name share the same entry;
- **URL** - URL for the main page (or for a page talking about the given Logo)
- **Year** - the year of the first and the last known versions;
- **Version** - the number of the last known version;
- **Status** - the status of the implementation. *Active* if it is still under development and new versions are expected sooner or later. *Frozen* is an implementation which development is stopped, but is still heavily used. *Dead* implementations are those that are not supported and most likely there are no active users (for some cases it is hard to say whether they are dead or frozen);
- **Platform** - the general OS or hardware platform;
- **Inspirer** - this field contains the name of another Logo implementation that inspired physically, ideologically or spiritually the development of the given Logo (this field will connect Logos in a tree). An inspirer could be:
  - **Logo** which is a previous version (parent) of the given Logo
  - **Logo** which documentation (e.g. set of primitives) is used as a reference
  - **Logo** which lacked some functionality and this triggered the making of the given Logo
- **Main creators** – the names of the people that created the given Logo. If it is a team with many members, then the names of the team leaders or principal researchers. Organizations, institutions and companies are framed in parentheses.

	Logo Name	URL	Years	Version	Status	Platform	Inspirator	Main Creator(s)
1.	*Logo		1989~1994	1.1	Dead	Connection Machine 2	Multi-Logo	Mitch Resnick (MIT Media Lab)
2.	??Logo??		1997	1.4	Dead	Amiga		
3.	11LOGO	<a href="ftp://publications.ai.mit.edu/ai-publications/pdf/AIM-307a.pdf">ftp://publications.ai.mit.edu/ai-publications/pdf/AIM-307a.pdf</a>	1973-1974		Dead	PDP-11	Logo (Ghost)	
4.	3-D Logo (Mac)		1991			Apple Mac		
5.	3D-Logo		1985		Dead	PC-9801 (MS-DOS)		
6.	380z Logo	<a href="portal.acm.org/citation.cfm?id=382172.383022&amp;dl=GUIDE&amp;dl=ACM&amp;idx=J692&amp;part=periodical&amp;WantType=periodical&amp;title=ACM%20SIGSMALL%2FPC%20Notes">portal.acm.org/citation.cfm?id=382172.383022&amp;dl=GUIDE&amp;dl=ACM&amp;idx=J692&amp;part=periodical&amp;WantType=periodical&amp;title=ACM%20SIGSMALL%2FPC%20Notes</a>	1981	n/a	Dead	RML 380z	Edinburgh Logo	Peter Ross, Ken Johnson (Edinburgh University, Research Machines)
