

**EDUCATIONAL TECHNOLOGY POLICY, RESEARCH AND OUTREACH
HOSTS THE 12TH ANNUAL C3 CONFERENCE OCTOBER 3RD AND 4TH**

Cyberethics, Cybersafety and Cybersecurity to be discussed

CLARKSVILLE, MD (September 1, 2013) – Developed to help educators and parents learn effective ways to ethically, safely, and securely use technology in the classroom and at home, Educational Technology Policy, Research and Outreach (ETPRO) is hosting the 12th Annual C3 Conference on October 3-4, 2013 at the University of Maryland.

Participants will hear from state and local educators, law enforcement, internet safety/security curriculum providers, researchers, and policy makers on a broad range of topics to include: cyberbullying, identity theft, privacy, online reputation management, and new and emerging technologies.

“With the constant evolution of new security issues, new technology gadgets to tempt students to gain an advantage, recent trends in cyberbullying and identity theft and the expansion of laws on copyright infringement and file-sharing, and the debate over privacy issues, this conference is useful for all educators and parents who want to keep up with the latest information,” said Davina Pruitt-Mentle, PhD, C3 Conference Chair.

For more information on the C3 Conference visit <http://www.edtechpolicy.org/C32013/> or contact Davina Pruitt-Mentle at dpruitt@edtechpolicy.org .

Educational Technology Policy, Research and Outreach (ETPRO), is a research and development organization located in Maryland connecting educational technology policy and research to instructional practice. ETPRO brings more than two decades of experience in the educational community, and more than a decade of experience in evaluating both formal and informal educational programs at the K-16 level, and conducting educational technology policy analysis. ETPRO’s expertise is founded on a combination of classroom practice across K-16 tied with a solid research base.
